Installation

- If necessary, use the included VESA mounting hardware to mount the appliance.
- If you are not mounting the appliance, attach the included rubber feet to the bottom of the appliance.
- Connect the ethernet cable from your Internet modem or router to the Internet port (LAN 1) located on the rear panel.
- Connect the ethernet cable from your LAN switch to the LAN port (LAN 2) located on the rear panel.
- Plug in the power adapter to a power source and connect it to the 12V power input located on the rear panel.
- Review the power indicator on the front of the appliance. If the indicator is green, the appliance is powered on.
- If the appliance is not powered on, press the power button.
